

Biologics by McKesson REMS Program

At Biologics, we know that patients on therapies that require a Risk Evaluation and Mitigation Strategy (REMS) can also benefit from our high-touch approach. And we also know that nothing is more important than the health and safety of your patients and those close to them. That's why we provide a REMS program that handles these time-sensitive therapies with speed and care, so you can feel confident your patients are getting the best possible care.

What makes our REMS program different?

Our Care Team. We have a designated REMS Care Team that stays with your patients throughout their treatment journey. When they get a call from the same pharmacist or nurse, patients feel cared about, develop a strong relationship with our clinical team, and are more likely to reach out when they need to. Our clinicians work closely with your team, so you can rely on us to take exceptional care of your patients and report anything clinically significant to you immediately.

Speed. Our REMS Care Team ensures the therapy you prescribe gets in your patients' hands as quickly as possible. From the moment we receive your referral, there's virtually no handoff — all elements of the prior authorization get handled by the same person with no delay in between. If your patient needs financial assistance, we have a dedicated person to cover that, too. Once the referral is approved, our system flags it for the REMS pharmacist so they see it quickly and counsel patients fast. When it's time to refill their prescription, our REMS nurses proactively reach out to you, which also allows for patient counseling if needed, and get the authorization and confirmation numbers so refills are ready in advance.

Increased adherence. Patients who have access to nursing care in real time stay on therapy longer and actually live longer.* Our dedicated REMS nurses provide your patients with counseling, answer any questions that arise and help them manage their side effects.

Send us your next referral!

You can submit your information in one of three easy ways:

Fax: 800.823.4506 | **Phone:** 800.850.4306, option 2

eScribe: Biologics is part of the Surescripts network. Search within your EMR using:

Pharmacy Name: Biologics

Pharmacy Address: 13000 Weston Parkway, Suite 105, Cary, NC 27513

NCPDP: 3430369 | **NPI:** 1487640314
